1. Simplify Recyclability Reporting. Reduce Future Costs.

RAM Assess is our purpose-built online platform designed to help you meet the requirements of the Recyclability Assessment Methodology (RAM) – a key obligation under Extended Producer Responsibility (EPR) regulations, which came into force on 1 January 2025.

Developed to streamline the complex process of assessing packaging recyclability, **RAM Assess** enables you to:

- Generate component-level recyclability RAG ratings at scale
- Automate bulk component assessments and save hours of manual work
- Identify packaging formats and materials likely to increase your EPR fees
- Calculate your estimated Local Authority waste management fees
- Forecast the financial impact of making strategic packaging changes

Whether you manage thousands of SKUs or a handful of key lines, **RAM Assess** gives you the insight and control to stay compliant, enhance your packaging data, and understand how your design choices influence future EPR costs. By improving data quality and highlighting potential cost impacts, **RAM Assess** helps you make smarter packaging decisions that support both compliance and wider business goals.

2. Why RAM Assess Matters

From 2026, the fees you pay for packaging compliance will be directly linked to how recyclable your packaging is. RAM assigns every component a **RED**, **AMBER**, or **GREEN** rating, and these ratings determine the modulated Local Authority waste management fees you'll pay under EPR.

RED

Difficult-to-recycle packaging is charged at a higher fee

AMBER

Moderately recyclable packaging incurs a standard base fee

GREEN

Widely recyclable packaging attracts the lowest fee

RAM is designed to reward better packaging design and penalise hard-to-recycle formats. The less recyclable your packaging, the more you'll pay.

That's where **RAM Assess** makes a key difference. It helps you:

- Identify packaging formats that could drive up future costs
- Close data gaps to help you avoid default **RED** ratings
- Make smarter, more sustainable packaging decisions
- Automate bulk recyclability assessments, saving hours of time and effort

3. Find the Right RAM Assess Plan for Your Business

RAM Assess is designed to meet the specific needs of your business, with three tailored tiers: **Core**, **Cost Reduce**, and **Transform**. Whether you're aiming to meet baseline compliance or drive strategic change, each tier offers increasing functionality to help you stay compliant and reduce costs.

RAM Assess **Core** Meet Basic RAM Compliance Requirements

Included as standard with Clarity membership, **Core** supports you in meeting your RAM reporting obligations. With **Core** you can:

- Upload packaging data and receive **RED**, **AMBER**, or **GREEN** (RAG) ratings
- Identify missing or incomplete data to avoid costly default **RED** ratings
- Produce bulk RAG outputs to support your submission
- Service available during Clarity data submission periods only

A simple tool that supports obligated producers in carrying out RAM assessments.

RAM Assess **Cost Reduce** Turn Compliance into Cost Savings

Cost Reduce goes beyond basic compliance, helping you lower future EPR fees with improved data and smarter packaging decisions. With this tier, you can:

- Analyse packaging data by SKU, component, or material
- Target the biggest cost-saving opportunities by prioritising changes with the highest recyclability impacts
- Use dashboards to visualise your packaging data and identify high impact formats
- Export RAG outputs to support procurement, redesign, and reporting
- Year-round access to support ongoing packaging decision

Ideal for businesses seeking actionable insights to cut costs, avoid **RED**-rated risks, and align compliance with commercial goals.

RAM Assess **Transform** Optimise your Packaging Strategy

Our most advanced tier, **Transform** is built for multi-site operations and sustainability-focused teams. It provides year-round access to powerful tools that embed recyclability into your packaging development and operational strategy.

- Edit and review data live within the **RAM Assess** platform
- Set and track cost-saving and recyclability targets
- Enable multi-user access across teams and sites
- Generate RAM-rated data to support your EPR submission
- Year-round access to support ongoing packaging decision

Transform helps you embed recyclability into business strategy, reduce packaging costs, and meet sustainability goals.

4. RAM Assess: Tier Features Summary

Navigating RAM doesn't have to be complicated. **RAM Assess** simplifies the entire process, enabling quick, accurate component-level assessments so you can make smarter packaging decisions, minimise costs, and stay compliant with confidence.

Whether you're meeting basic requirements or driving long-term strategy, **RAM Assess** has a tier to match your business. The table below outlines the key features of each option – **Core**, **Cost Reduce**, and **Transform** – so you can select the right level of support for your goals.

Feature	Core	Cost Reduce	Transform
Access to the RAM Assess dashboard and data insights	✓	✓	✓
Generate RAG recyclability ratings by component	✓	✓	✓
Automate bulk RAG assessments for multiple SKUs	✓	✓	✓
Forecast modulated waste management fees		✓	✓
Identify and resolve Red ratings caused by incomplete data		✓	✓
Evaluate cost impacts per component, material and supplier		✓	✓
Year-round access for continuous packaging decision-making		✓	✓
Import, merge and consolidate multiple datasets to streamline analysis		✓	✓
Edit, model and track live dataset changes for strategic decision making		✓	✓
Multiple dashboards to track product, component and supplier costs		✓	✓
Multi-user access for cross-functional teams and sites		✓	✓
For Clarity Members*	Included	£3,499 /Annum	From £9,950 /Annum
For Non-Clarity Members*	£1,000 /Annum	£4,999 /Annum	From £9,950 /Annum

*Prices are exclusive of VAT

Not sure which tier is right for you?

Our account management team is here to help. If you're unsure which **RAM Assess** tier best fits your business, get in touch.

We'll assess your needs and recommend the most effective solution based on your packaging profile, compliance goals, and cost-saving opportunities.

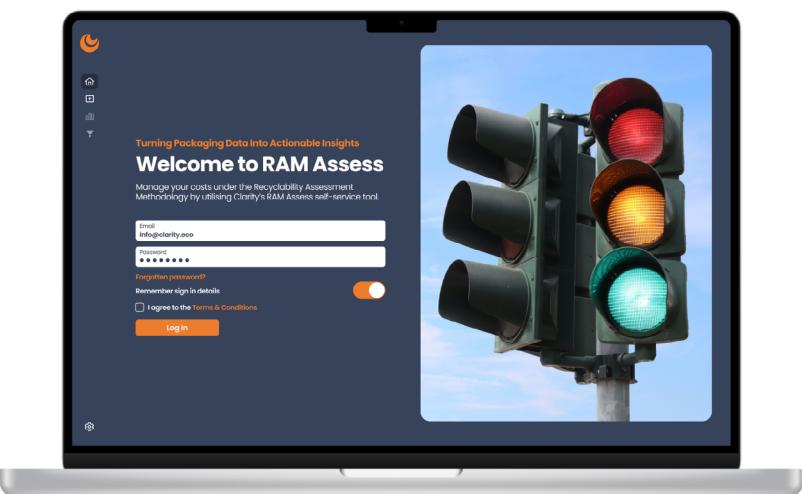

Simply e-mail us: info@clarity.eco

5. Completing Your RAM Assessment with RAM Assess

RAM Assess is your essential platform for navigating the key requirements of the recyclability assessment process, enabling you to quickly and confidently complete component-level assessments and understand the commercial impact of your packaging choices.

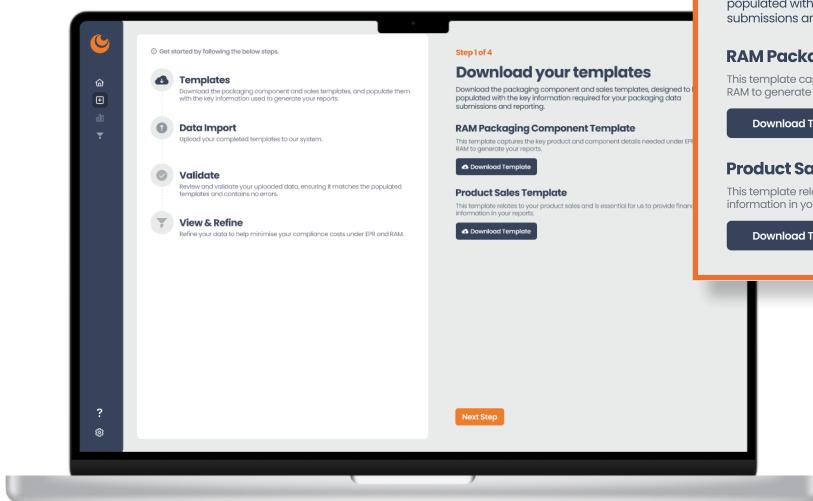

Here's how it works:

1

Download Your Data Templates

Start by downloading and completing the RAM Data Template, where you'll input product, component, and material details.

Download your templates

Download the packaging component and sales templates, designed to be populated with the key information required for your packaging data submissions and reporting.

RAM Packaging Component Template

This template captures the key product and component details needed under EPR and RAM to generate your reports.

[Download Template](#)

Product Sales Template

This template relates to your product sales and is essential for us to provide financial information in your reports.

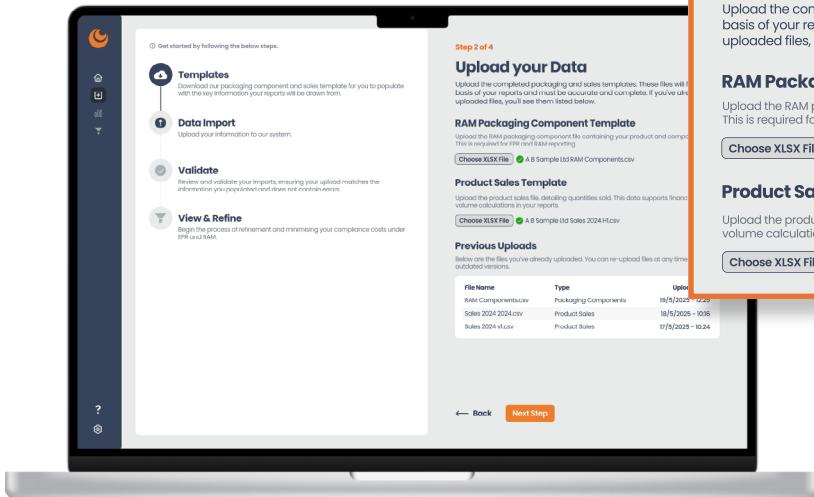

[Download Template](#)

If you're using **Cost Reduce** or **Transform**, also download the Product Sales Template to capture sales volumes by SKU or product line, which enables **RAM Assess** to calculate your waste management fees.

Upload Your Packaging Data

2

Upload your completed Excel files directly to the **RAM Assess** platform. **RAM Assess** then reads and processes your data to prepare each packaging component for assessment.

Upload your Data

Upload the completed packaging and sales templates. These files will form the basis of your reports and must be accurate and complete. If you've already uploaded files, you'll see them listed below.

RAM Packaging Component Template

Upload the RAM packaging component file containing your product and component data. This is required for EPR and RAM reporting.

Choose XLSX File | A B Sample Ltd RAM Components.csv

Product Sales Template

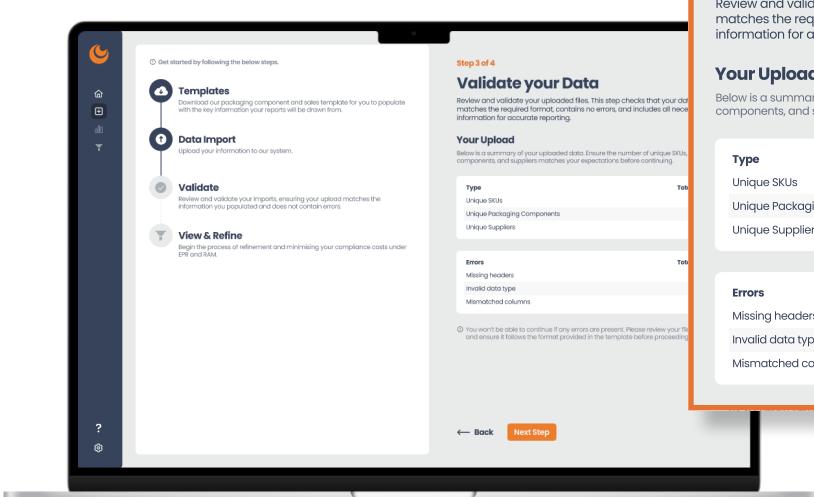

Upload the product sales file, detailing quantities sold. This data supports financial and volume calculations in your reports.

Choose XLSX File | A B Sample Ltd Sales 2024 Hi.csv

Validate Your Data

3

RAM Assess summarises the uploaded data, confirming the number of SKUs and components. You'll be prompted to fix any format errors or data gaps before continuing.

Validate your Data

Review and validate your uploaded files. This step checks that your data matches the required format, contains no errors, and includes all necessary information for accurate reporting.

Your Upload

Below is a summary of your uploaded data. Ensure the number of unique SKUs, packaging components, and suppliers matches your expectations before continuing.

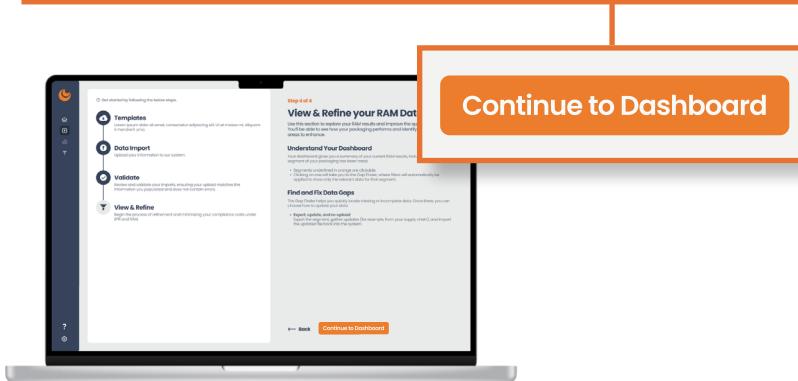

Type	Total Count
Unique SKUs	613
Unique Packaging Components	1,432
Unique Suppliers	322

Errors	Total Count
Missing headers	2
Invalid data type	10
Mismatched columns	1

View and Refine Your RAM Data

4

You'll be presented with on-screen instructions on how to understand and interpret your **RAM Assess** dashboard before you access your RAG rating report.

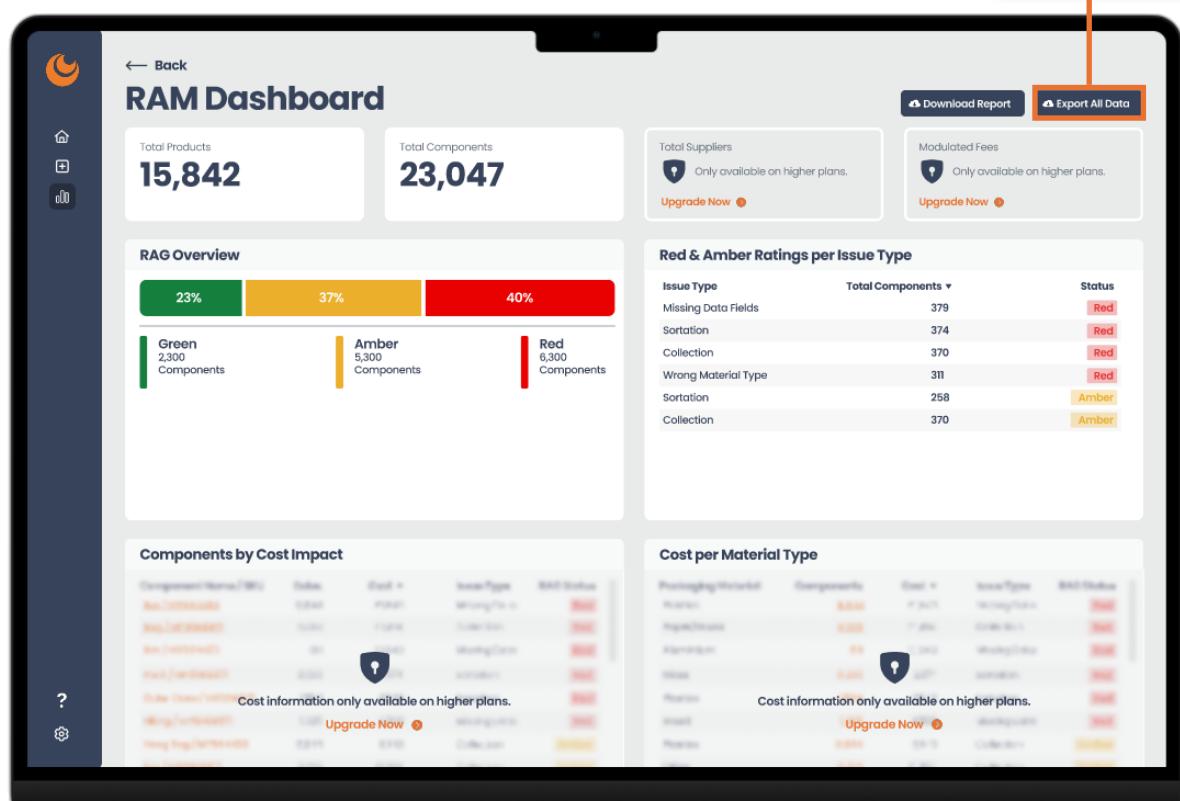

View Your RAM Dashboard

5

The **RAM Assess Core** dashboard gives you a clear summary of your packaging components, using **RED**, **AMBER** and **GREEN** (RAG) recyclability ratings.

Use the “**Export All Data**” function to download your component data, complete with RAG ratings, ready to support your EPR submission.

 **Export All Data**

You'll see an overview of the number of products and components assessed, including a breakdown by RAG score and a specific count of those classified as **RED** or **AMBER**.

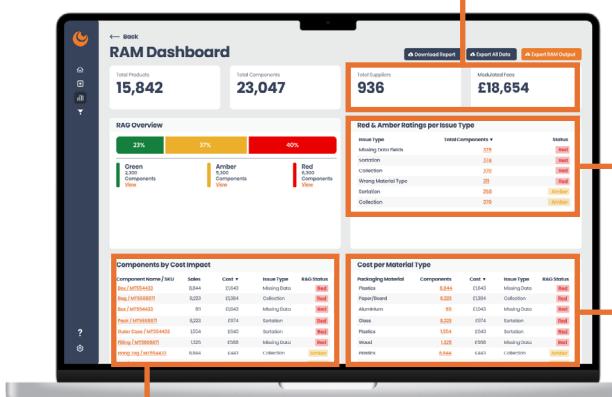

Enhanced Functionalities with Cost Reduce and Transform

6

Cost Reduce and **Transform** provide you with advanced tools and insights that can lower EPR costs, improve RAG ratings, and drive smarter packaging decisions – while streamlining your workflow by automating RAG generation at scale, reducing manual work and human error.

RAM Assess uses your sales data to instantly estimate your waste management fees, giving you early insight into potential EPR costs.

Red & Amber Ratings per Issue Type

Issue Type	Total Components	Status
Missing Data Fields	379	Red
Sortation	374	Red
Collection	370	Red
Wrong Material Type	311	Red
Sortation	258	Amber
Collection	370	Amber

You're able to analyse **RED** and **AMBER** ratings by drilling into a specific SKU and its components so you can see why it received a certain rating.

Cost per Material Type

Packaging Material	Components	Cost	Issue Type	RAG Status
Plastics	8,844	£1,643	Missing Data	Red
Paper/Board	8,223	£1,384	Collection	Red
Aluminium	611	£1,043	Missing Data	Red
Glass	8,223	£974	Sortation	Red
Plastics	1,554	£643	Sortation	Red
Wood	1,325	£568	Missing Data	Red
Plastics	8,844	£443	Collection	Amber
Other	8,223	£1,384	Collection	Amber
Other	8,844	£1,643	Sortation	Amber

Components by Cost Impact

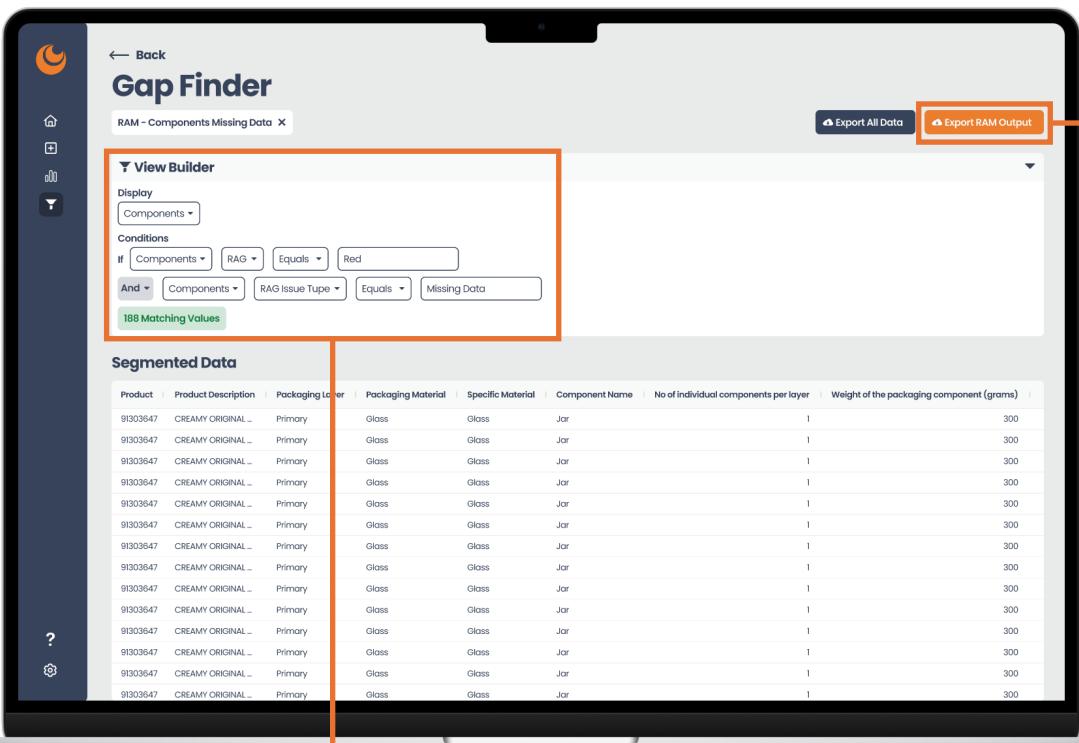

Component Name / SKU	Sales	Cost	Issue Type	RAG Status
Box / MT554433	8,844	£1,643	Missing Data	Red
Bag / MT5668871	8,223	£1,384	Collection	Red
Box / MT554433	611	£1,043	Missing Data	Red
Pack / MT5668871	8,223	£974	Sortation	Red
Outer Case / MT554433	1,554	£643	Sortation	Red
Filling / MT5668871	1,325	£568	Missing Data	Red
Hang Tag / MT554433	8,844	£443	Collection	Amber
Box / MT5668871	8,223	£1,384	Collection	Amber
Box / MT554433	8,844	£1,643	Sortation	Amber

Analyse packaging costs at component level to model the savings potential of switching from your current packaging formats to more recyclable, cost-effective alternatives.

Gap Finder (Cost Reduce and Transform only)

7

Use the Gap Finder tool to identify where packaging changes will deliver the greatest cost savings and recyclability improvements, backed by detailed analysis and impact modelling.

The screenshot shows the 'Gap Finder' tool on a laptop screen. The interface includes a 'View Builder' section with dropdowns for 'Display' (set to 'Components') and 'Conditions' (set to 'If Components RAG Equals Red' and 'And Components RAG Issue Type Equals Missing Data'). Below this is a table titled 'Segmented Data' with 188 matching values, showing columns for Product, Product Description, Packaging Layer, Packaging Material, Specific Material, Component Name, No of individual components per layer, and Weight of the packaging component (grams). The 'Export RAM Output' button is highlighted with an orange box.

View Builder

Display

Components ▾

Conditions

If Components ▾ RAG ▾ Equals ▾ Red

And ▾ Components ▾ RAG Issue Type ▾ Equals ▾ Missing Data

188 Matching Values

Build cost models from multiple datasets to uncover which packaging formats are increasing your waste management costs and where savings can be made.

RAM Assess automatically generates RAG outputs that you can use to help complete your EPR submission by entering the data into the Clarity dashboard.

Export RAM Output

6. Complete Your RAM Submission Now

Take control of your RAM submission with the tools, expertise, and support only Clarity can provide. By following our simple step-by-step process and using **RAM Assess**, your business can take control of its EPR obligations, optimise packaging design, and cut unnecessary costs.

STEP

1

CONFIRM YOUR RAM ASSESS LEVEL

Speak with your Clarity Account Manager to confirm which **RAM Assess** tier is right for your business and we'll provide your login details to the platform.

RAM Assess Core

RAM Assess Cost Reduce

RAM Assess Transform

STEP

2

COMPLETE THE RAM DATA TEMPLATE

Gather your household packaging data together and then download and complete the **RAM Data Template** by logging into **RAM Assess**.

Extended Producer Responsibility - required packaging data
